Water Quality Advisory Lifted for Powdersville Area

POWDERSVILLE, S.C. (July 23, 2021) – Since the sanitary sewer overflow on July 6th, 2021, ReWa has conducted internal and third-party sampling of the affected area, including Craven Creek and Woodson Lake. Test results indicate that waters have returned to ambient or standard pre-event conditions. Therefore, all recommended precautions associated with the spill are lifted.

This event did NOT affect ReWa's ability to provide sewer service to the area and will also NOT affect drinking water. For additional information, please contact our hotline at 864-299-4004. Any updates will be posted to www.rewaonline.org.

About Renewable Water Resources (ReWa)

Since 1925, Renewable Water Resources (ReWa) has been committed to providing high-quality wastewater treatment services to the Upstate of South Carolina while promoting a cleaner environment, protecting public health and the water quality of Upstate waterways, and developing the necessary sewer infrastructure to sustain our community and growing economy.

With nine water resource recovery facilities and more than 350 miles of pipe, we serve a broad geographic area, including Greenville County and portions of Anderson, Laurens, Pickens and Spartanburg Counties. Each day an estimated 42 million gallons of water passes through our trunk lines and reclamation facilities before being cleaned and returned to our area rivers and streams. To learn more about ReWa, visit www.rewaonline.org.
