Sanitary Sewer Overflow (SSO) Due to Build Up of Grease

Greenville, S.C. (February 27, 2020) – Due to an excess buildup of grease **Renewable Water Resources (ReWa)** has recently experienced a sanitary sewer overflow (SSO) in the area near 23 North Acres Drive Greenville, SC.

This event will NOT affect ReWa’s ability to provide sewer service to the area and will also NOT affect the drinking water. The SSO is caused by additional flows in the sewer lines resulting from grease buildup. ReWa staff has arrived onsite to address the SSO in an attempt to minimize the overflow. We encourage residents to avoid waterways local to the addresses above until water testing has been completed. For additional information, please contact our hotline at 864-299-4004. Any updates will be posted to www.ReWaonline.org.
