

Addendum II to Polymers for WRRF's

Posting Date: January 30, 2019

In published Request for Bid 427 Polymers for WRRFs please note the following update(s):

Q. Can you please clarify the feed rate dosage units given on the bid spec? We are used to seeing grams polymer/dry ton of solids. It appears to be listed as lbs/ton. Can you please clarify?

A. When emulsion polymer we receive are placed on a scale, the daily polymer pounds used in the thickening/dewatering process are divided by the tons of solids entering the process, resulting in polymer pounds per ton. We are unsure how to convert grams of your product to pounds.

If you have any questions and/or concerns, please do not hesitate to contact Julie Dacus at JulieD@re-wa.org or Maryanna Levenson at MaryannaL@re-wa.org.
